Professional Experience

February–July 2014 — **Developer**, *JCDecaux NA*, New York City, United States.
- Made an Android app for the US operations team and deployed it to 100+ operators
- Maintained internal management software like sales reporting and operation scheduling

July–August 2013 — **Web developer**, *Pointvirgule.net*, Compiègne, France.
- Short and long-term projects built in PHP / MySQL for Fortune 500 companies
- Maintained and added features to legacy websites
- Wrote a full inventory supervision interface for a major pharmacetics logistics company
- Wrote a PDF generation program for high quality, robust, fast and lightweight output
- Built an application for a kiosk touchscreen (> 39")

Example of websites: www.sncz.net, www.servicesfuneraires.fr or www.lechateaudelatour.fr

2011–2013 — **Freelancer**, *Creapont*, Pont-Sainte-Maxence, France.
- High-profile scraping of highly defensive websites
- Built mainly websites with Wordpress (custom plugins and themes)
- Used LimeSurvey (survey software) and contributed back to the project

Example of websites: Commercesdepont.fr, edu-survey.org, fetedelabulle.fr

Other Experience

2012–2014 — **Founder & President of FabLab UTC**, *Student hackerspace*, Compiègne, France.

Built my own hackerspace with over 100k€ in funding, built many machines (3D printer, quadcopter, robot, ...) & software. Also teached to other student in many subjects like Android, Python and Arduino.

assos.utc.fr/fablab

Juin 2011 –2014 — **Technical & Marketing lead**, *ACAPL*, Pont-Sainte-Maxence, France.

Helped a local association for 3 years: Website, mobile application, communication (20+ posters & flyers, two guides, many emailing compaigns) and organizing events.

Education

2009–Present — **Student in Software Engineering**, *University of Technology of Compiègne*, Compiègne, France.
